

What are we proposing?

The proposal will consist of sustainably planted and managed green spaces that will give all new residents immediate access to nature on their doorsteps. The new green spaces will support the carefully designed homes, connecting with the established and retained tree-lined hedgerow and woodland setting.

To the south and west of The Folds Fir Tree Lane will be a traffic-free 'Quiet Lane' – a Bridleway with occasional places to sit.

The homes within The Folds will be set back from the existing trees and woodland that surround the development. This space will form a new publicly accessible Parkland with a naturalistic quality – native species trees set in flowering meadow grassland with paths and places to sit.
