

Transport and Parking

What are we proposing?

One Horton Heath - Access & Circulation

- The newly completed **‘Avenue’ link road** will provide the principal means of access to Hedge End and Fair Oak.
- Parking provisions have been carefully planned to balance the future needs of residents with the need to promote long term sustainable travel objectives.
- A high quality **walking and cycling greenway** will run east-west linking The Avenue and the Local Centre through the heart of The Folds.
- Safe and direct footpaths and cycleways will follow key roads and provide direct routes.
- **Fir Tree Lane** reclassified as a new bridleway for pedestrians and cyclists.
- New links will connect into the **improved public rights of way**.
- New **bus stops** along the main internal road will support sustainable travel and reduce reliance on cars.
- **Highways contributions** agreed as part of OPA to mitigate the development impacts at key junctions.

The Folds - Connectivity & Parking

Indicative aerial view of apartment parking court with varied surfaces, planting and trees. Parking courts offer convenient, well surveilled parking provision close to homes but allowing for people-friendly streets with a balance of landscaped public space and parking bays.
